

HSBC – Renovation of Corporate Offices

Panama City, Republic of Panama

HSBC is the world's largest financial group in terms of market capitalization. It was also rated the third largest company by Forbes 2000.

This project involved the complete renovation of 4 floors of HSBC office space, each with more than 10,000 SF each, avoiding any interruptions in bank operations.

Project scope included dismantling and renovation of the bank's security system, lighting, IT infrastructure, electrical, and mechanical systems.

Additional services included review and revision of existing construction documents, construction project management to include bidding and awarding of contracts, construction inspection, selection and supervision of interior design installation and move management.
